ALLAN LINE ROYAL MAIL STEAMERS TO LIVERPOOL

—CALLING AT MOVILLE, LONDONDERRY—

New Turbine-Engine Steamers
VICTORIAN, 12,000 Tons. VIRGINIAN, 12,000 Tons.

Steamers
TUNISIAN, 10,575 Tons, Twin Screws. BAVARIAN, 10,375 Tons, Twin Screws. IONIAN, 9,000 Tons, Twin Screws.

The steamers are the largest, fastest and finest in the Canadian Transatlantic Lines, and are excelled by none in the accommodation for all classes of passengers. The Saloons and Staterooms are amidships, where least motion is felt, and all above the main deck, thus securing perfect light and ventilation. Bilge keels have been fitted to all the steamers, which has reduced the rolling motion to the minimum. The vessels are also fitted with Marconi's system of wireless telegraphy.

Electric lights are in use throughout the ships, and the cabins have all the comforts of modern first-class hotels. Cuisine is unsurpassed.

PROPOSED SAILINGS

From Halifax		From Halifax	
CORINTHIAN	Feb. 20	TUNISIAN	Mar. 27
PARISIAN	" 27	PARISIAN	April 3
SICILIAN	Mar. 6	VICTORIAN [new]	" 10
BAVARIAN	" 13	BAVARIAN	" 17
IONIAN	" 20	VIRGINIAN [new]	" 24

TUNISIAN embarked mails and sailed from Rimouski, Sunday, September 6, 1908, 12.25 noon; arrived at Moville and landed mails Saturday, Sept. 12. Time of passage, after deducting difference in time, 6 days, 5 hours, 27 minutes.

BAVARIAN is a twin steamer to TUNISIAN (10,375 tons), made over 20 miles per hour on trial trip. Time of passage, Moville to Rimouski, 6 days, 3 hours, 12 minutes, the fastest on record over this course.

IONIAN (twin screws)—Average time of this Steamer, on her five passages between HALIFAX and MOVILLE is 7 days, 6 hours. Her record passage is 6 days, 11 hours, 27 minutes.

PARISIAN sailed from Rimouski Sunday, October 20th, 10.15 a.m., and arrived at Moville Sunday, October 27th, 7.30 a.m. Deducting difference in time, 4 hours, 50 minutes, the actual time of passage was 6 days, 12 hours, 39 minutes.

Winter rates now in effect. For further particulars, apply to any Agent of the Company.

The Royal Military College

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia In fact it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandantand military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry. French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or a civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control and consequently of self-reliance and command, as well as experience in controlling and handling their fellows. In addition the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and good physical condition.

An experienced medical officer is in attendance at the College daily.

Seven commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of 9½ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from $750 to $800.

The annual competitive examination for admission to the College will take place at the head-quarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination or for any other information, application should be made as soon as possible, to the Adjutant General of Militia, Ottawa, Ont.

EDITORIAL.

This Number is Edited by H. S. Crowe.

It is one pleasure in this issue to refer to the hockey situation in a way somewhat differently from what we had anticipated but a few days since. Of late a great surprise has come—for we feel sure no McGill men and probably but few Toronto men, expected the result of last Friday night's match in Toronto to be what it proved to be. The reversal of probabilities and the unexpected possible having occurred in the Queen's-'Varsity match, the McGill hockey team are now the proud champions in the I. C. H. U.

Had Toronto lost to Queen's, there would have been a repetition practically of the football situation of last autumn. What would have been the outcome in such a case we shall not here speculate.

oughout, every McGill man has had the utmost confidence in our team, and they have nobly won what

they now so worthily hold—the championship.

In passing, however, we beg to refer to another point. Why, we wonder, could Queen's so strongly object to a McGill man acting as referee—why object at all. This, we think, was wholly unjustifiable.

While we congratulate our team and rejoice in our hockey successes, we think the occasion apt, indeed, for the mention of one other point particularly. What McGill wanted was the first place—won through good, honest, clean sport. That place has been won. But after all, is this what the majority of the students really desired? It would not seem so if one were to judge from the number of students at the various matches. The men of McGill are ready enough to criticize the management of the teams and the work of the players—but when it comes to a matter of support either by encouraging presence, by financial help or otherwise, the vast majority of men have other engagements and other more important considerations. This should be, must be remedied if McGill is to retain her own proper prowess in matters athletic. Let the intelligent and active support of athletics be a self-imposed, if not actually imposed, part of the curriculum of every McGill student.

❖ ❖

We have read with much interest the report of the Young Men's Christian Association of McGill University, which appeared in last week's issue of this paper.

It must be a source of great satisfaction to the members of that Association to be able to report such marked advances in membership, Bible Study enrollment, and attendance at the Sunday afternoon meetings. The "Outlook" congratulates them upon these results, and upon the high place which the Association has attained in our University.

While there are 376 men of McGill members of this Association, yet we know that scores of other men have been able to make use of its Boarding House List and Book Exchange.

The manner in which these departments of this work have been run, has given, we believe, entire satisfaction to the student body. The men appreciate this work, and also the way in which the new students are introduced to McGill life by means of the Freshmen receptions, the hand-book, etc. Might we suggest, however, that next year's hand-book contains a map of the city.

While the work of the Association is primarily for the religious welfare of the men, yet it has done a great deal for their social life, and also a great deal to help them in more practical ways, such as we have mentioned above.

Nor can we let this opportunity pass without making a reference to its leaders. It is almost universally acknowledged by college men that the Association has been very fortunate in its choice of leaders. Its officers have been, and are to-day, men who have the respect and confidence of their fellow-students. They are men who take a keen and active interest in athletics and other college activities, men who stand high in their class work.

The "Outlook" congratulates the Association on its fine, new building, Strathcona Hall, which is a creditable acquisition to the McGill buildings. Next year, when settled in their new quarters with all its advantages, the Association will have an opportunity of extending and enlarging its work for the benefit of McGill men. Of this opportunity, we believe, the Association will make good use.

Champions of the C. I. H. U.! Intercollegiate champions of America! These proud titles again rest where they should, and McGill once more takes her proper place as the foremost figure in the Intercollegiate hockey world. It seems singularly appropriate that McGill should be the rcognized leader in the great game which she originated. True we did not have the satisfaction of defeating Quten's in the play off. Yet Toronto's victory only shows the inferiority of Queen's, and it is probably for the best that they have been spared the humiliation of defeat in a final game.

❖ ❖

It is easily to be seen which university is the commanding figure in Intercollegiate athletics. In the past three years McGill has won the hockey championship twice, the Intercollegiate track meet twice, and the football championship once. Toronto has won the track meet once, the football championship once. Queen's has held hockey and football championships for one year each. In other words, McGill has, in three years, won five championships to four won by Toronto and Queen's together. Yet some reactionists talk of the decadence of athletics at McGill since the introduction of the Inter-Class system.

❖ ❖

Correspondence.

Feb. 18th, 1905.

To the Editor of the OUTLOOK:—

Dear Sir,

With each September about eleven hundred young men come to Montreal, some to begin, but more to continue a course in one or other of the various departments of McGill. Before many hours each man receives an invitation to pay a "gymnasium and campus" fee. The Freshman "pays up" and feels that never can he put money to better use. The older man "pays up," but with very different feelings.

A few days pass. The students have all found rooms and closed the bargains with their respective landladies, for better or for worse. Soon the general excitement has subsided, and the daily routine begun, and all feel a bit dull and tired. Those who have come not for the first time choose to walk on a street more dusty than popular. The newer men have up to this time pictured a fine gymnasium with all modern improvements and comforts—how could they cast their eyes around the college campus and do otherwise?—and thither belate themselves.

But what is their dismay when they reach the building! Nor are their spirits lightened on entering. The air smells old and stuffy, centuries old. Dim gaslights enable them to see a few forms groping about. On coming nearer they recognize them as class-mates. This is their first introduction to the McGill University gymnasium; and a more unhygienic, unattractive and unsuitable an affair can hardly be imagined. With such a building situated sufficiently far from the college to be inconvenient to all, is it any wonder that so few students ever see the inside of the gym. Most of them are pent up in their rooms for hours, and then have to content themselves with a walk to their boarding house or to the college. Some few can stand this for a couple years, but many cannot.

It is a shame that a university thoroughly equipped and up-to-date should in the matter of health preservation be so frightfully deficient. It is hard to say with whom the fault may lie. Possibly no one is responsible. But if not, the earlier someone is made responsible, the bet-

ter for the student body. The campus serves its purpose during the fall and spring, but through the long winter months there is naught to take the place of a gymnasium, in which respect McGill is behind nearly every college on this continent, and we won't compare even favorably with many of the so-called "one-horse towns."

Something should be done, and that right away. It seems to be the idea to spend no money on the old gymnasium, but to wait till we get a new one. A very clever scheme this to save a few hundred dollars at the expense of the health of twice as many students. We have needed a gymnasium just as much this year as we shall next, and we shall need one next year just as much as two or three years hence. A new building will not be ready before, at the very least, two years have passed and in the meantime the old one must suffice. But enough expense should be attached to make it respectable, even though it were going to be used but one year, and surely the same authority which issues the McGill calendar, inviting students to come here, should also see that at least a second or third rate gym. be kept in readiness to receive them.

I am,
Yours truly,
FAIR DEMANDS.

❖ ❖

To the Editor of the OUTLOOK:—

Sir,

Owing to the regrettable and unjustifiable criticisms which have been made in the sporting columns of the Montreal Star of Captain Gilmour's action in playing for Ottawa on Saturday, February 11th, I would like to make the following statement in behalf of the McGill Hockey Club:—

First.—That Mr. Gilmour had received permission from the executives of 'Varsity and Queen's before deciding to play with the Ottawa club.

Second.—That the reason this permission was not made public sooner, is owing to the fact that it was secured by Mr. R. W. Shillington, President of the Ottawa Club, direct from Queen's and 'Varsity, and that McGill waited until official assurance of the accuracy of the stament had been received from the two executives in question.

Third.—That, therefore, Mr. Gilmour was well within his rights in playing for Ottawa, and has not by any means forfeited his rights to play in Intercollegiate matches.

Personally, and as an official of the Hockey Club, I regard it as highly regrettable that Mr. Meldrum, Arts '07, reporting for the Montreal Star, did not take steps to verify this rumor before giving it publicity, especially as in this case the Hockey Club had refused him any official statement pending the receipt of official communications on the subject.

THOS. M. FYSHE,
Manager of the McGill Hockey Team.

❖ ❖

Apology for My College Course.

I am not a person who is often given to moralizing, nor could my somewhat crude views of some sides of our everyday life be put down to a philosophic temperament, though I have sometimes suspected that such might be the case. Most of us have a certain amount of philisophy in our mental make-up, but it is a lamentable fact that we generally suit our philosophy to the kind of life we lead instead of making our lives the incarnation of a high and noble philosophy. In making the few remarks which I have in my mind, I do not think that they are the result of this misguided philosophy which serves

very often as a cloak to muffle our consciences, and which I might, therefore, very well make use of myself, but a statement of my own genuine opinions upon a subject wherein the views of other people for the most part differ very widely.

You have no doubt often heard the expression that So-and-so was not making the best of his college course. You have probably made the assertion yourself of some erring individual and, if you are a meditative person, you may even have put the same question to yourself, when an importunate creditor has forcibly brought home to you the error of your ways or the proximity of examinations has reminded you of many golden hours spent in more pleasant pursuits than that of studying. But have you ever gone on to consider what "making the best of one's college course" consists in? I fear that the majority of our elders, should you ask them to define the expression, would open their eyes with surprise, adjust their spectacles, if they wear them, to their most sage and impressive angle, and tell you to ply your books diligently, to acquire knowledge while you may, that idleness at college is a sure harbinger of failure in after-life, and a lot of like rubbish. And they have perhaps a deal of right on their side, for learning is a rare thing. Their ideal is a sort of human encylopoedia, a walking library of information who can discourse learnedly on any subject—and who is, as a rule, a bore and plague to his less gifted fellow-men. We see some men who come to college imbued with these precepts, whose sole companions are their books, their only relaxation the walk from the library to the lecture-room, and often in our hearts we envy them their application. Occasionally we even say harsh things of them because they are a source of ever-present reproach to our own idle lives. But this should not be. Far from being sneered at, such men should be honoured for their courage in following the course which their consciences tell them is the right one and for never deviating from the paths of what they consider their duty. They are living up to their convictions. But while I say that we should not censure them, are they not to be sincerely pitied? Our college life is supposed to fit us for our struggle in the cold world afterwards, and I very much doubt if the man who has never lived outside himself, whose personality has been so warped by constant application to study that he has forgotten the meaning of the word "play," is the one who will enter the field best equipped. He has not really known what it is to mingle with other men, and consequently he has never developed the strength of character which must come to the man who learns to hold his end up in the broader streams of college activity. The only conflict he has ever engaged in is with his books, and he will find these but puny weapons when he comes to measure them with faculties which have had a more generous training. Moreover, one thing we will require above all others when we enter the world's arena is a good constitution, and think of the evil effects of incessant study upon a man's nervous system and digestive organs! I am sure a moment's thought will convince anyone that such a man will have but little chance in the race with his sturdier brothers.

As a matter of fact I sincerely believe that over-study is as bad a vice as smoking or drinking, and equally harmful in the long run. For after all is said and done, the man who does the most good in the world is not the one who keeps his nose eternally on the grindstone, and only allows a smile to spread over his face

when he is shoving a dollar into his pocket; it is rather the man who allows the brighter sides of his nature to shed a ray of sunhine upon those about him and who sees something in life besides its struggles. The everlasting Swat who has nothing to give to his fellow-mortals but a curt nod or an irritable growl, is not very much appreciated here, and I don't think he will be any more appreciated hereafter.

We have all no doubt got to undergo our share of the toils and troubles in this world, but there is a great deal of happiness to be had in it nevertheless, and he who does not take his pleasures while he may, will indeed have but a dull and sickening existance. After all it seems to me that in all likelihood it is the mind that is broad enough to appreciate and take advantage of the green fields and shady nooks along the paths of life that will be the best prepared to stand against life's adverse winds and stony roads when they come, and in like manner it is the man who does not ignore the sunnier sides of his university career that is making the best use of the four years he spends there. The cup of learning will be none the less healthful for having a little sugar in it.

The more I realize how beautifully free I am from any danger of being handicapped by this disease of overwork, the less do I consider that my college course has been wasted. Years hence, when I am compelled to hustle to provide board and lodging for my loving family and life is not all beer and skittles, it won't be the memory of hours of plugging that will afford me the pleasant reminiscences of my college days; it won't be the recollection of how I won a prize for logic or mathematics that will fill me with a longing to be back once more in McGill's dear old halls; but it will be the fond thoughts of those idle moments when books were thrown aside and studies forgotten; it will be the memory of the friendships and the follies of student-days, that will bring a pleased smile to my care-worn cheek and cause me to go out to meet my creditors and shoulder my labors with a lighter heart and a springier step.

ATHLETICS.

WE ARE CHAMPIONS.

Toronto Defeated Queen's in a Hard Game--Score 9 to 8—McGill Thus Wins the C. I. H. U. Championship.

When the news flashed over the wires late Friday night that Toronto had defeated Queen's, giving McGill the championship, the general feeling was one of incredulity. When, however, the morning papers confirmed the report, with details of a hard fought game, satisfaction and surprise were unbounded. Though we all knew the championship was coming to McGill this year, we hardly expected to get it so easily, and Toronto's victory simplified a difficult situation in a most satisfactory manner.

Although we did not have the pleasure of defeating Queen's in a play-off, we can all appreciate the fact

that the Presbyterians went down before a team which we completely defeated on two occasions this season. Queen's lost the championship, simply because they didn't have a team strong enough to win its way into the finals. They were beaten fairly and squarely Friday, and McGill fully deserves the championship by her victories of the team that defeated Queen's.

Our congratulations are due to Captain Gilmour, Manager Fyshe and the other six men who helped to bring the silverware back to McGill. They played steady, consistent hockey all season, and the quality of our team was shown by our splendid record, three wins out of four games, 31 goals scored, only 13 goals lost.

We must not forget the fact that McGill has the title of "Intercollegiate champions of America." It is only fitting that the greatest university in Canada should have so distinguished an International honor. It is to be hoped that we will hold it for many years to come.

The Game.

Beyond the meagre newspaper discriptions, it is hard to get any idea of the game itself. It appears, however, that it was very rough. No less than 25 penalties being enforced. According to a gentleman who saw the game, Toronto won because they played better hockey, checked harder and skated faster than their opponents. There was no suggestion of "fluke" in the victory. It was clean cut and well deserved.

Toronto had all the better of the first half, which was rather ragged owing to the heavy checking. Queen's worked hard, but their combination and rushes were invariably broken up by the strong Toronto defence. Montague was in particularly good form, and his lifts were a constant menace to his opponents' nets. The half ended 5 to 3 in Toronto's favor, and had the forwards shot better and bunched less, Queen's would have been completely snowed under.

In the second half Queen's played desperately, and took their opponents' off their feet. They evened up in short order, and soon forged ahead. Throughout the half, which was exceedingly rough, they maintained their lead, though Toronto had all the better of the game at times. With but four minutes to play, Queen's lead 8 to 7, and their crowd of supporters were already congratulating one another. But Toronto were by no means beaten. They piled their entire defence down on the Queen's goal; within two minutes they scored, and one minute to play tallied the final goal. A few seconds later time was called with Toronto victors and McGill champions of the C. I. H. U.

The teams were:—

Toronto (9).		Queen's (8).
Lash,	Goal,	Mills.
Broadfoot,	Point,	McDonnell.
Montague,	C. Point,	Clarke.
Patton,	Rover,	Richardson.
Southam,	Centre,	Farnham.
Martin,	L. Wing,	Walsh.
Thoms,	R. Wing,	Williams.

Referee—Burns, Toronto.

Notes.

Queen's absolutely refused to play off in Ottawa. So does McGill—now.

We hate to gloat, but a large smile came over our face when the Presbyterians and the snow drifts met in head on collision.

Twice champions in three years; that's a fairly good record.

There was a tremendous convultion of nature in Kingston late Friday night. An earth-quake or a landslide seemed to have struck in the vicinity of the college grounds. The walls of Grant Hall have sagged perceptibly as a result, and the founda-

tions of the Methodist church have settled down.

Queen's didn't bother taking the cup down to Toronto with them. Pity they didn't. It would have saved their express charges to Montreal. The silverware is going to look fine in its old, familiar place in the library.

❖ ❖

The Referee Question.

There has been a good deal of discussion around college with regard to Queen's action in refusing to accept a McGill man as referee in the game with Toronto the other night. The general feeling seems to be that Queen's acted in a most unsportsmanlike manner, and that their refusal was a direct act of discourtesy, both to Mr. Young and to McGill. The facts of the matter briefly are:—

Queen's wired to Mr. Young, Secretary of the Union, stating that they had agreed with Toronto to accept Mr. F. McKenna, of McGill, as referee. Mr. McKenna was unable to make the trip, and as Mr. Young had to go to Toronto anyway to attend the meeting of the C. I. H. U., it was decided that he should referee the game himself. It may be mentioned that as Secretary of the Union Mr. Young had the power to appoint as referee whosoever he pleased.

On his arrival in Toronto Mr. Young met Mr. Baker, of Queen's, and told him how matters stood. Mr. Baker seemed surprised, but beyond mentioning the name of Mr. Burns, of Toronto, said nothing definite. In the evening Mr. Young arrived at the rink, and was in the dressing room putting on his skates, when members of the Queen's team informed him that the referee they had chosen, Mr. Burns, was already on the ice. Mr. Young was naturally surprised and stated his intention of refereeing the game. The Queen's men objected, stating that they did not care to have a McGill man for referee, and that Mr. Burns would have their support. In order to avoid unpleasantness, Mr. Young waved his rights and authority and the game proceeded under Mr. Burns.

It is difficult to see what defence Queen's can bring forward for their extraordinary attitude in the matter. It almost seems a direct insult both to Mr. Young and to McGill. It has been an unwritten rule in Intercollegiate hockey that when two teams are competing, a representative of the third shall act as referee. What reasons Queen's could have had for violating this mutual understanding in hard to see. In previous games McGill has always accepted a Queen's man, though on two occasions, at least, to her own detriment. The gentleman who officiated here last year will be well remembered by those who saw the game, if the farce he made of it could be called such, and this year Mr. Patton was by no means competent to fill the position. The general feeling at McGill is one of indignation and surprise at Queen's action, and it is to be hoped, if possible, the Kingston men will make some attempt to explain their extraordinary stand in the matter.

The OXFORD, UNIVERSITY STREET,

A Cafe designed for and catering to an exclusive trade

FOR LADIES AND GENTLEMEN

Intercollegiate Hockey Meeting.

Frank McKenna Vice-President—Important Matters Discussed.

The annual meeting of the Intercollegiate Hockey Association was held at Toronto Saturday. Representatives were present from McGill, Toronto, R. M. C. and McMaster. The financial statement showed a balance of $7,661.50, which was depleted by a $15 grant for souvenirs for McGill, the senior champions, and $10 for Toronto University, the Intermediate champions. The question of purchasing a cup for the Intermediate series was left over.

The question of William Gilmour playing with Ottawa against Wanderers a week ago evoked some discussion. It was decided to enforce rigidly the rule forbidding the players playing for more than one club in the same year, and to refuse all permits in the future. The same year was defined as the season covered by the schedule of games. After that term players may take part with any club they please.

Exhibition games do not come under this head. Stanley Cup games are championship and not exhibition matches.

The eligibility of players was the subject of a good deal of discussion. Henceforth the bona-fide student must be vouched for by a certificate furnished by the union and signed by the registrar and a lecturer or professor whose classes he attends.

The following officers were elected: Hon. Prs. Geo. H. Chown, B.A., Kingston; President, M. P. Baker, Kingston; Vice., Frank McKenna, McGill; Sec.-Treas., J. C. Sherry, Toronto; Executive Committee, H. L. Sims, McGill; G. E. Richardson, Queen's; C. D. Jamieson, Toronto; Cadet Howels, R. M. C.; E. R. Fitch, McMaster. The representatives at the meeting were: McGill, C. A. Young; Queen's, Marty Walsh and Dick Mills; Toronto, C. B. Jamieson, D. E. Robertson; McMaster, J. B. McArthur, and E. R. Fitch, R. M. C. Cadet Gill.

❖ ❖

Vics II. Beat Montreal II.

And Now Will Meet McGill II in the Semi-Finals.

The Victoria Intermediates, by defeating the Montreal Intermediates on Saturday afternoon earned the right to play in the finals for the Intermediate Championships.

The Vics. were the heavier team of the two, and in the rough play, which marked the second part of the match that counted. Montrealers, however, mixed things up a little themselves.

The first half resulted in a tie, each team scoring one. In the second Victorias scored three and Montreal one more, so that the score at the end of time stood, Vics. four, Montreal two.

The teams were:—

Victoria (4).		Montreal (2).
Ross,	Goal,	Bremner.
Campbell,	Point,	Percival.
Davidson,	C. Point,	Horsfall.
Eveleigh,	Centre,	Chipchase.
Dunlop,	Rover,	Brown.
Brown,	R. Wing,	Liffiton.
Ross,	L. Wing,	Marshall.

Referee—Mr. Griffiths, Montagnards.

This victory puts the Vics. in the semi-finals along with McGill II. The deciding game will probably be played off Saturday at the Arena, but at the time of going to press no definite arrangements had been made. However, announcements will be made in the Montreal papers, and every student should make sure to look the matter up and be on hand for the play off. The Vics. have a strong team, but so has McGill, and

the decisive way in which Outremont was defeated leaves the result of the Victoria-McGill very much in doubt. The Victoria supporters will turn out in large numbers to cheer their team on. Let McGill men do the same. Both the team and the executive need your support.

❖ ❖

Harvard Defeats Yale.

The Harvard septette put it all over Yale Saturday in New York by 7 to 1. The two teams were tied for the Intercollegiate championship, and this was the final game. As champions of the American Intercollegiate League, the Harvard team may challenge McGill for the Intercollegiate championship of America. Their team would receive a warm welcome in Montreal, though their is but little fear of the proud title McGill now holds going to the other side of the line.

❖ ❖

Intercollegiate Athletics.

The delegates from Queen's, Toronto and McGill to attend the Annual Hockey Association meeting got together Saturday afternoon and considered the formation of an Inter-university annual athletic meet. The matter was not decided finally, but it is probable that the association will be formed. The recommendations agreed to by the representatives of the three athletic bodies last fall came up, but were laid over for final consideration by the three associations. McGill has adopted them, but Queen's and Toronto have not as yet. Queen's denied that Mr. McInnis represented them at all. The clauses recommended were:—

(1) That no one shall be allowed to compete in any Inter-university contests who is not a bona fide student in actual attendance at lectures.

(2) Certificates of eligibility must be signed by the professor of the department whose lectures the student attended, and by the academical head of the university.

(3) Students of affiliated colleges are bona fide students.

This action seems a good move in the right direction, and should be of great assistance in putting Intercollegiate athletics on a firm and purely amateur basis.

❖ ❖

R. V. C. Athletics.

Senior-Junior Hockey Match.

On Saturday, February 18th, at 12 o'clock, the Seniors and Juniors lined up for the final match in the Inter-Class series.

The game, which resulted in a victory for the Juniors by a score of 2 to 0, was on the whole the best of the season, both as regards combination and individual work.

For the Juniors Miss M. Fraser did splendid work, and got in some spectacular rushes, two of which resulted in scores. Miss A. Fraser and Miss Rae Mowatt did some good combination work, while Miss Stanton at cover, was a veritable wall.

On the Senior team Miss Gillean was easily the "star," and was well supported by all the forwards, while the checking of Miss Kimber in goal was a feature of the game, and prevented the Junior score from being much larger.

The personnel of the teams was as follows:—

Seniors.		Juniors.
V. Kimber,	Goal,	E. Ryan.
I. McCoy,	Point,	H. Braidwood.
M. Hitchcock, (Capt.)	C. Point,	G. Stanton.
A. M. Gillean,	Rover,	M. Fraser. (Capt.)
L. Munn,	Centre,	A. Fraser.

F. Moule, R. Wing, B. Gillmor.
M. Idler, L. Wing, R. Mowatt.
Referee—Miss G. Woodley.
Umpires—Miss Clarke and Miss Masson.

❖ ❖

Basketball.

McGill's next game will probably be with Queen's, and it is to be hoped that the home team will be better supported than it has been in the past.

Efforts are being made to arrange with the Y. M. C. A. and Westmount champions for a series of games to decide the city championship, for which McGill will make a strong bid.

❖ ❖

Science '06 vs. Science '07.

Athletic Association Decides that Protested Games Must be Played Over.

At a meeting of the Athletic Association Monday afternoon, the vexed question of the Science '06-Science '07 game came up and was finally decided. The two teams met last week in the Inter-Class series and the former won out by 3 to 2. Before the game '07 protested S. G. Newton, '06, who had played with the Stirlings earlier in the season. Their protest was upheld by the Athletic Association by the deciding vote of the chairman. This means that the game must be played over again.

This question has aroused considerable discussion around college, but now seems settled once for all, and if precedent is followed in future years, the regulation concerning men who have played on outside teams will be strictly enforced.

In the columns of the "Outlook" of 1902, the matter is discussed and the decision of the hockey club reported "That no player who has played in games with teams outside of the Intercollegiate League during the season, shall be elegible to take part in any Intercollegiate Inter-Class or Inter-Year games." This seems final and supports the action taken by the Athletic Association.

❖ ❖

Freshmen Are Champions.

Won the Inter-Class Series by Defeating the Juniors 15 to 11.

The Freshmen are now champions of the McGill Inter-year basketball series. On Saturday they claimed the title by defeating the Juniors in a close and exciting game at the university gymnasium by a score of 15 to 11. The winners have a splendid team and have upheld nobly the reputation of their Year.

The Juniors were the most dangerous rivals the Freshmen had, and the win on Saturday decides the championship. The combination play of the '06 team was very pretty, but '08's superior shooting accounted for the result. The teams were:—

'08.		'06.
Forbes,	Defence,	Keddy.
Shanks,	"	McMeekin.
Holbrook,	Centre,	Higgins.
Trenholme,	Forwards,	McCuaig.
Rowell,	"	Ross.

Referee—E. Locke, '05.

The Seniors won an easy victory over the Sophomores in the game series, scoring 20 to 7. Two of '07's men failed to show up, and Meldrum and Crutchfield were enrolled as substitutes. The teams were:—

'05.		'07.
Findlay,	Defence,	Meldrum.
Cropper,	"	Rubinovitch.
Locke,	Centre,	Crutchfield.
McDermott,	Forwards,	Wright.
Stewart,	"	Engel.

Referee—Rowell, '08.

Track Club Meeting.

A small attendance was the main feature of the Track Club's annual meeting last week. Little interest seemed to be taken throughout college, and many of those most conspicuous in athletic matters were not present.

President Stewart was in the chair and called the meeting to order shortly after eight. Reports were received from the various officers. The report of the Treasurer, Mr. Brown, was particularly favorable, showing a balance of some $36.00 to hand. The election of officers resulted as follows:—Hon. President, Dr. Harvey; Hon. Treasurer, Dr. Elder; President, Wickware; Vice-President, Young; Secretary, DeBeck; Treasurer, Baird.

After the election of officers, the following gentlemen were recommended for life membership to the Athletic Association:—F. J. Teee, W. J. Scott, A. Cumming, G. MacIntosh.

After the meeting the track team elected their captain for next season. Mr. G. E. McCuaig was the choice, and will lead McGill to victory again next autumn.

❖ ❖

Exchanges.

On February 15th, the University of Nebraska celebrated her thirty-sixth birthday. In honor of the event all classes were suspended for the day, as usual.

From the student we learn that the theatre night held January 31st, was a great success. From reading the editorial we judge that the evening on the other side of the Atlantic takes the same festive course as our own. "Boys will be boys" the world over.

Last week we spoke of a copy of the addresses at the opening of University of Pennsylvania's new gym. A few facts might be of interest to our readers. The entire building cost $600,000, and is a monument of the loyalty of graduates of U. of P. Paramount in importance to us, however, is the knowledge that Dr. Tait McKenzie is the professor of Physical Education. The construction is fireproof, floors and columns being of concrete. On the main floor is the swimming pool, 100 ft. by 30 ft. wide, graded from 9 ft. to 4 ft. 6 inches. The pool is arranged for water polo, etc., and may be viewed from a spacious gallery. The gym. floor itself is 70 ft. by 140, lighted by ample windows and a spacious skylight.

In the wings are accommodation for the various teams, football, baseball, etc., with 1,500 lockers, accommodation for 2,000 more. The equipcured, promises to be the best that mises to be the best that money can money can procure.

"He's a great practical poker."

"I suspected as much."

"Ah! he has been playing some prank on you, eh?"

"No, but I played a little joke on him yesterday and it made him furious."—Philadelphia Ledger.

Patient—Look here, doctor, you said if I took a bottle of your tonic I would have a remarkable appetite. Why, I eat only one soda cracker each week.

Doctor—Well, don't you call that a remarkable appetite?—Chicago News.

"Have you a sister?" asked Miss Willing of her brother's college chum.

"Alas no," he replied. "But I have often longed for the soothing influence of a sister's love."

"How sad," she sighed. "But fortunately you may be able to secure a satisfactory substitute."

"And what is that ?" queried the young man.

"Why the love of some other fellow's sister," answered the artful maid.

Freshie—"How do you say Mormon in French?"

Soph.—"More mon? Plus d'argent of course."

"There's a flower-like bloom on your cheek"—
Wrote the bard, but his spelling was weak;
When his sweetheart read "flour"
She shed tears in a shower—
And now when they meet they don't speak!

—Lantern.

Alice, have you been eating onions?

"Yes Harry, why?"

Well come out to the Park slide with me and I'll try and take your breath away.

"The evening wore on" read the man with the book.

"May I ask what the evening wore on that particular occasion" interrupted the would-be wit.

"Well to tell the truth" continued the reader, "t'was the clothes of a summer's evening."—Ex.

At the Arts Dance.

"If you feel chilly," said he, as they strolled, "remember I have your shawl here on my arm."

"You might put it around me," said she demurely.

Science '07 Dinner.

Stern father (to son)—"What time is it that you're getting in?"

Soph.—"About one o'clock." (Clock strikes three.)

Father—"Dear me, how that clock stutters!"

An East Anglian photographer advertises in his local paper: "Your own baby, if you have one, can be enlarged, tinted and framed, like the above, for 6s 6d."—London Chronicle.

He—I told your father that I just dote on you.

She—"And what did he say?"

He—That I had better find an antidote.—Illustrated Bits.

"Do you keep a dog?" asked the country cousin.

"No," answered the city relative. "We tried the experiment half a dozen different times, but without success. You see, there is a sausage factory in the next block."—Chicago News.

Father (from top of staircase to a junior)—"Emily, is that young man gone?"

Emily—"Awfully, pa."

Lack of any large number of competitors for the Rhodes scholarships is reported in the college journals of nearly every state in the Union. The cause assigned is the high Greek requirements.

The Oberlin Review is advocating for Oberlin College the organization of a Press Club with membership open to those interested in journalism.

Among the Yale graduates law has been the most popular profession. More than three thousand of them are lawyers, half as many are teachers, about one thousand are physicians, and the same number have entered the ministry. Business claims fewer graduates than any of the professions.

The New York Tribune has offered a prize of $25 for the best essay, not exceeding eight hundred words in length, setting forth the benefits which result to colleges and to the student body from college fraternities. Another prize of $25 will be given for the best similar essay against college fraternities.

ABOUT THE COLLEGE

Public Speaking Contest.

The McGill Literary Society will hold its annual public speaking contest on Friday evening, March 3rd, in the Molson Hall, beginning at 8 o'clock. For the encouragement of public speaking a gold medal is offered for competition in the Society, and the following gentlemen have handed in their names to the Secretary to enter the contest, viz: R. Calder, B.A.; E. McGougan, B.A.; C. Adams, Arts '05; J. Jenkins, Arts '05; J. Forbes, Sci. '06; J. Shearer, Arts '06; G. Cousins, Arts '06. The programme of the evening will be diversified with instrumental and vocal selections.

Regulations governing the contest will be found in the issue of the "Outlook" November 17th, 1904. All students and friends of the university are cordially invited to attend.

C. ADAMS,
President.

Hospital Etiquette.

All down the years in the history of our modern medical education, ward-work and attendance at the out-door departments of our hospitals absorbs a large part of the time and attention of the senior student. It is there amid so much food for thought that his mind has room to grow and he has time to think; it is there he sees how different theories bear the brunt of test, it is there, in short, his training is rounded out as can be effected in no other way. To the right thinking man the quiet wards, perhaps more than any other factor afford a stimulus which create in him large ambitions and a true sense of the responsibility which soon must be his lot.

The one lamentable feature of the student's zeal is, that he should so often allow his enthusiasm to get the better of discretion. I refer to the system of what is popularly called "butting in" at clinics or any other phase of hospital work. The etiological factor, this "butting-in" bacillus, is no new micro-organism. Apparently it is endemic about the wards, and epidemics occur with appalling regularity. Year after year men graduate from our college thoroughly disgusted with the lack of gentlemanly courtesy toward their fellow-students shown by a few members from each class. Happily the majority are immune, but those of an egotistic temperament seldom escape infection. One attack does not confer immunity, but tends to predispose to future recurrences. Some few exacer-

bations of the chronic condition are very much in evidence this term, and it is high time for radical treatment to be adopted.

Our hospital work is so fairly arranged by the powers, that be that the most ardent student can find scope for his enthusiasm without making himself a fit subject for criticism by his fellows. The grievance is not an imaginary one, but one of vital importance to the class individually and as a whole, and the brazen manner in which it is sometimes done but adds insult to injury. Above all, as the years roll by, a college education should knit men closer together, but until the bump of self-sacrifice undergoes further development in the "Genus Lomo," estrangement is the more natural course under existing circumstances.

In conclusion, without posing as a prophet, let me assure whomsoever the cap fits that the estimation of one's classmates forms a fair criterion of what the wide world (and especially the members of his chosen profession) later on will think, and if he wishes to climb to any professional dignity later on, let him get into training by at least playing fair while at college.

"JUNIOR."

❖ ❖

The Arts Dance.

That the Arts Dance was a brilliant success in every sense of the word, and in spite of the early closing by-law lately passed by the Faculty, was acknowledged by all those who were fortunate enough to be present last Friday evening.

A dance in the Royal Victoria has always been popular, for it is an ideal spot for such an event, and that it has lost none of its popularity was clearly demonstrated by the number of graduates who took the opportunity to again mingle with the student throng, while the number of students present showed a marked increase in the courageousness of the Undergraduate. Thus a goodly crowd of young people were gathered together very shortly after the hour of invitation, and it was here that the splendid arrangements of the committee immediately became manifest.

For several years attempts have been made to avoid the inconvenience, the tearing of dresses, the mixing of dances caused by the crowding in the corridors, but it was left to this year's committee to solve the problem. The guests were received in the large hall by the patronesses, Mrs. Peterson, Mrs. Moyse and Miss Oakeley, and everybody had to enter the room in order to obtain a dance programme.

After most of the guests had arrived the orchestra began to draw forth sweet strains from their instruments and the dancing commenced.

For the first few dances the floor, which was in excellent shape, was rather crowded, as everybody had come early, mindful that it would be difficult to get through on time, but after all had settled down and the quiet corners had been discovered, the number on the floor was just sufficient to afford an excuse to the unskilled Freshman when he stepped on the dainty foot of his fair and charming partner.

The programme called for eighteen dances and three supper extras; these were well assorted and were just got through with by the fatal hour. The selection of music was excellent and up-to-date, and Mr. Silverstone's rendering thereof was good, although the speed in a few of the number might have been better. A noticeable feature of the music was the apparent willingness of the orchestra to respond to encores.

The simplicity, yet artistic neatness

of the decorations at once struck one on entering the hall. The hall itself is very handsome, and the banners hanging from the walls on either side together with the large Union Jack and the mass of palms which served as a screen for the orchestra, made a fitting background for the array of youth and beauty which whirled around its floor.

Sharp on eleven the orchestra ended "Red Feather," and the guests retired downstairs to the spacious dining-hall, there to partake of the more solid and tangible portion of the evening's entertainment. The arrangements for supper showed a vast improvement on last year's Arts Dance, but there was still the same difficulty of the men jostling and scrapping to get a plate or something or other for their partners, and then upsetting half of it on the clothes of the man next them, that this is avoidable was well shown by the excellent manner in which supper was served at the Junior Dance, and it is a pity to go back to the old ways.

At the call of the bugle the revellers again resumed the dancing, and everyone was now kept going at record speed. If any stimulus had been necessary to add new life to the already gay throng, it was furnished by the glad news which arrived from Toronto that McGill had the hockey championship, and which spread like wild-fire throughout the building. Immediately the 'Varsity representative became the most popular man in the room.

Altogether, the evening was one of the most successful in every way—even financially it is hoped—that has ever been held at the college, and the committee are to be congratulated, not only on maintaining the high reputation which this dance already enjoys, but on increasing it greatly.

Those responsible for this satisfactory evening were:—

C. H. S. Blanchard—Chairman.
R. O. McMurtry—Secretary.
C. W. Davis—Treasurer.

'05.

Misses Gillean, Idler, Michaels, McCoy; Messrs. Howitt, Blanchard, McMurtry, Graham.

'06.

Misses Gilmour, Rorke, Sharp; Messrs. Peterson, Payne, Shearer.

'07.

Misses Armstrong, Masson, Williams; Messrs. Cattanach, Davis, Rider.

'08.

Misses McKeen, Sauvalle, Younger; Messrs. Baird, Hawkins, Penny.

Notes of Other Colleges

Princeton has submitted the following question for the debate with Harvard, which will occur at Princeton on March 28: "Resolved, That the free elective system is the best available plan for the undergraduate course of study." The choice of sides rests with Harvard. It will be decided after the last trial.

Several of the college buildings on the Rio Grande College campus, at Gallipolis, Ohio, were destroyed during last week, by dynamite explosions. As the cause of the disaster remains a mystery to the faculty, we might suggest that possibly some ambitious freshman was experimenting along

the lines of his newly acquired scientific knowledge.

The senior class of the dental department of O. M. U. recently declared a strike, because one of the professors, they allege, was guilty of injustice during the examinations. They carried their point that they should not be forced to recite this term to the unjust professor.

Through the generosity of Payne Whitney, captain of the Yale Varsity crew of 1898, the boat house at Gale's Ferry will be rebuilt and enlarged, and will be fully equipped in time for the reception of the crew squad in early June. Some changes in the quarters had been planned, but Mr. Whitney's offer will mean more extensive changes than had been hoped for. The dormitory and bathroom additions will be especially ample.

❖ ❖

Y. W. C. A.

Dr. Tory was the speaker at the Y. W. C. A. on Monday. As the thought of his talk, he took the three sentences of Jesus, as recorded in the first chapter of John. The first was "What seek ye?" This was the first direct challenge Jesus made to the world to come and ascertain whether his claims were true. There was a general feeling of expectancy among the Jews, and they eagerly listened to all Christ's teaching. Only when he refused to be placed on a temporal throne did they fall away from Him. As a man, Jesus is the greatest personality the world has ever seen, and as a teacher of men, he has no equal. He taught the doctrine of non-resistance to evil, also that the more a man has the greater use he should make of it, and his third doctrine was that of love—the love of God and the love of man.

The second sentence was "Come and see." This is an invitation to enter into Christ's life; to look forth on humanity as He did, and to realize His thought and purpose toward man.

The third sentence was "Thou shalt see greater things than these." Our test of the claims of Jesus is living. There is inspiration for the very best and highest in the words and life of Christ.

Last Wednesday two papers were read; one by Miss Bessie Wisdom on the Literature of the Bible, which was very instructive as well as interesting. The other, by Miss Clark, on the Symbolism of the Bible.

The Purest Form in which Tobacco can be Smoked.

LONDON · LANCET.

CLASS REPORTS.

R. V. C., 1906.

"Well, you have won," said a Sophomore with a sigh. "Yes, but you have only one," said another with a tired smile. It was a close match and '06 had one of the hardest fights of its hockey career. But that is an old story now; to-morrow's decisive match is the important subject.

We were so pleased with ourselves that we went down to the gymnasium to see whether the other members of '06 were upholding the class in the proper way. We were rewarded by seeing a very exciting Senior-Junior match which ended quite satisfactorily, a result due in part, we hope, to our sympathetic appreciation as evidenced by excited cheering and luminous '06 numerals conspicuously displayed.

A studious Junior in the Redpath Library was vaguely conscious of the persistent noise caused by the snow shovellers on the roof. Finally lifting her head wearily she said, somewhat impatiently, "I do wish those people would come in some other way!"

"Cowper's tendency to insanity was early seen in his shrinking from exams."

"Eccentricity is very often simply genius working in the brain."

R. V. C., 1908.

It seems that two of our brilliant physicists are thirsting for the blood of the person who so injured the axle of the "little cart" that it refuses to perform its course properly along the inclined plane. They also claim that the loss due to friction was infuriatingly large. After working for an hour and a half our friends are now trying to discover the compensation for this loss of time, which should be theirs according to the Law of the Conservation of Energy.

It does seem rather a pity that we did not win in hockey last week, but when the Seniors only got one goal we can't fell very badly beaten.

You might not believe it, indeed we hardly could ourselves, but we have developed a class poetess. Here are two of her latest productions:—

Vera had a little dog;
Its coat was black as ink,
It followed her to Physics
And her heart began to sink.

The class began to laugh so hard
The teacher did declare,
The doggie was the quietest
Of all the students there.

"Why does the dog love Vera so?"
The murmur passed around
"Because she loves the little dog
Which on the way she found."

P's our professor so learned and wise,
H is the hall which we fill with our sighs,
Y is our youth which so quickly takes flight,
S stands for spectrum with colours so bright,
I incline plane which our poor brain annoys,
C calculation which our time employs,
S are the Sups. which no one enjoys.

ARTS, 1906.

Interviews With Great Men.

The scribe crept stealthily along the hall. A cloud of tobacco smoke issuing from the doorway at the end showed that the famous Geo. H—ss—r was in. The trembling scribe knocked on the door, and was answered by a loud "come in, and be quick about it." George, reclining at his ease in a comfortable chair, puffed furiously at a huge pipe, sending forth volumes of smoke which filled every corner of the room. The scribe was seized with a violent attack of coughing.

"Well, what do you want?" said George. "Can't you see that I am busy?"

"I merely came to interview youn illustrious highness," mumbled the scribe.

"Fire away," said George, as he prepared to do some tall story telling.

"From what part of the universe do you come?" was the first question.

"The West," answered George," where all the clever men come from. You might have known that merely by looking at me. I came to McGill because I heard that things were very backward here. Taking pity on the students, I made a martyr of myself, and came to show them the proper styles. How do you like my new tie? Yes, I am rather a good athlete. I am the star of the Arts '06 hockey team, and could easily get a place on the Ottawa team—if I cared to. As a runner, no one can beat me. In my Freshman year I did the hundred yards in 9 1-5 seconds. I consider this fair time, especially as I was encumbered with an overcoat, and was running on Guy Street. The only reason why I don't go in for the sports is, because I wish some other poor fellows to have a show. Don't you think that is rather generous of me? One of my hobbies is dog collecting. I have fifty-seven varieties. (He stooped and hauled from under the table a most ferocious looking brute). This one is called "Dearest." I gave it that name merely from force of habit. Am I much of a scholar? What a question! I was recently implored to accept a Rhodes Scholarship, but declined, for the same generous reason mentioned before.

Here the scribe was attacked by another coughing fit, and H—ss—r, fatigued by his strenous mental work, decided to close the interview. Swinging back one of his number tens, he suddenly launched it on its deadly errand. His aim was true, and the next moment the scribe was out in the hall picking up his crumpled leaves and battered pencil. But bodily pains were forgotten amid the joy at having seen and talked to the man of the hour.

Master Ned DeBeck recently received a letter from one of his admirers.

Prof. V—n—b—rg, the eminent economist, recently published the astounding news that, in the Main, bars are preferable as a medium of exchange.

This is a Chance

THE DANCING SCHOOL...

KARN HALL - - 2362 ST. CATHERINE ST.

While most of us recognize that it is most essential to be posted in social ethics for the advancement of our interest.

Many treat the matter, as of littte consequence when the knowledge of deportment, dancing and balance, make an impression not often equalled by the accomplishments.

When you take up dancing why not embrace the whole study It costs no more money and you are made sure in matters that too often place a man at a disadvantage, when he is in doubt Come and take a course with me and you will agree that it is a very satisfactory burden to carry. Dancing is learned in a few lessons and the practice follows the second hour of study. The progress in the science of Terpsicorean enables me to make the study for my pupils a pleasure as well as an art. Terms are in the reach of all (special term) and a recreation that will do you good, come put in a little of the holiday time.

A. ROY MACDONALD, Teacher

ARTS, 1908.

The hockey team of this class have had a very successful season, and have arrived at the proud position of champions of the Arts teams. They are well deserving of congratulations.

One of our professors has told us that he will inform us when he has discovered a case of "accidental genius" in the class. If anyone thinks that he has claims in this direction he should send in his name lest he be forestalled.

We might offer a few suggestions in order to stimulate the efforts of those whose modesty holds them back.

These are some grounds of various claims to "accidental genius:"—

H—st—ngs, because he can deal in foreign stamps, and do mathematics at the same time.

Sh—w, because he sometimes fails to correct the lecturer.

McG—bb—n, because he can play the giddy goat.

The Reporter, because he missed two reports and still survives.

SCIENCE, 1905.

It is with regret that the class heard of the inundation, which flooded the various compartments and offices of the Engineering Building.

NOTRE DAME and ST. JAMES STREETS, MONTREAL.

Papers of two of the most popular professors were destroyed—those of the assistants in Civil and Electrical Engineering. Their is little diversity of opinion, however among the students as to whether this was due to the fact that they were the only two having papers of value, or, that the flood did not descend on the other offices.

In the Hydraulic Machinery lecture it is pathetic to see the homesick and forlorn expression, on the faces of the different members of the class. As the learned doctor with his pleasant undulating voice reads the clear and lucid explanation of how a turbine turns round, they are carried back in vision to the days of the country school house and to the afternoon's dictation exercise.

Class Dialogue.

"See, are we supposed to take this down?"
"You don't, unless you have to."
"You're not reading slow enough."
"I think I am reading slow enough."
"Well, I know you ain't."

(Great applause with showers of unbaked beans).

'05 dinner representatives continue to cover themselves with glory. If reports be correct R. A. W. was only rivalled by F. C. J. in weight and capacity.

FIT REFORM WARDROBE
2344 St. Catherine Street

Despite the fact, that king-storm has reigned supreme during the last few weeks, tieing up the railroads and making communication practically impossible, it is observed that our class-mate, R. P. B., still receives those tri-weekly epistles, addressed in that clear feminine hand so familiar to all those who frequent the bulletin-board.

Those of us, who are far from home envy R. P., and it has been suggested that their prompt delivery is due to some potent charm, but a minute examination reveals only a bewitching aroma of violets and jesamine.

SCIENCE, 1907.

The first annual dinner of Science '07, which was held on February 16th in the Queen's Hotel, proved to be an innovation indeed. Covers were laid for about fifty, including the representatives of the various Years and Faculties of the University.

These were, Mr. Weageant, Sc. '05; Mr. Forbes, Sc. '06; Mr. Mills, Sc. '08; Mr. Swift, Arts; Mr. Brown, Medicine.

During the evening several high class sensational "stunts" were performed by gentlemen whose mental equilibrium had been disturbed by the good things on the menu. Amongst these was the flying-high-dive-onto-your-neck-get-tangled-up-in-the - curtain-stunt.

The first toast of the evening, "The King," was proposed by the President, which was drunk after singing "God Save the King." This was followed by others, to our "Alma Mater," proposed by A. O. Hayes, and replied to by L. Kingston; then the Faculty by C. E. Brooks and H. M. Lamb. "Our Sister Classes," by A. H. Beckwith, which was replied to by the representatives of the several classes, and last, but no least, "The Ladies," by H. G. Rogers, and replied to in a very able manner by M. D. Barclay and H. K. Paulsen, whose slight form had been draped in a snowy table cloth. This brought the entertainment to a close with many wishes that the next one might be equally enjoyable.

Notes.

Should one red headed man call another man red headed even if he is ———? Do you love me like a boot Jack?

Jack was in great demand as was Pat. Will pepper and salt make Mac's hair grow? Why did so many want to get into that train for Ottawa?

SCIENCE, 1908.

If the class dinner is to be a success, every member of the class should feel it to be his duty to support the scheme as far as possible. It is impossible to expect every man to attend such a function, but there is no reason why a large percentage of the class should not do so. It is the indifference with which so many of the boys regard such a proposition, that is so fatal to any class function. If only one-fourth of the class go to the dinner, it may be a success as a dinner, but as a class function it will be a failure. Either let the men go in a body or drop the scheme altogether.

John Ross Mills went as our representative to the Science '07 dinner last week, where he made a good impression and also a good speech.

C—rm—ch—l was treated to a shampoo in the usual way last week in the drawing room for the usual cause.

H—rb—rt got a hair cut.
